

Authentication Flow Documentation Template

1. Introduction

1.1. Purpose

[Describe the purpose of this authentication flow documentation.]

1.2. Scope

[Define the scope of the authentication system.]

1.3. Authentication Overview

[Provide a high-level overview of the authentication architecture.]

2. Authentication Architecture

Component	Description
Frontend Client	[User-facing application]
Authentication Server	[Handles authentication requests]
Database	[Stores user credentials and session data]
Third-Party Provider	[OAuth / SSO Provider if applicable]

3. Authentication Methods

Method	Description
JWT Authentication	[Token-based authentication]
OAuth 2.0	[Third-party authorization flow]
Multi-Factor Authentication	[Additional security verification]

4. User Authentication Flow

Step No.	Process	Description
1	User Login Request	[User submits credentials]
2	Credential Validation	[System validates credentials]
3	Token Generation	[JWT / Session token created]
4	Access Granted	[User authenticated successfully]

5. Authorization Flow

Role	Permissions
Admin	[Full system access]
User	[Restricted access]
Guest	[Limited public access]

6. Session Management

Feature	Description
Session Timeout	[Define inactivity timeout duration]
Refresh Tokens	[Describe token refresh mechanism]
Logout Process	[Describe session termination process]

7. API Authentication

Endpoint	Method	Authentication Required
/api/login	POST	No
/api/profile	GET	Yes

8. Request and Response Examples

Sample Login Request

```
{
  "email": "user@example.com",
  "password": "*****"
}
```

Sample Login Response

```
{
  "token": "jwt_token_here",
  "expires_in": 3600
}
```

9. Security Considerations

Security Area	Implementation
Password Encryption	[bcrypt / Argon2]
Transport Security	[HTTPS / TLS]
Rate Limiting	[Enabled / Disabled]
Brute Force Protection	[Describe protection mechanism]

10.Error Handling

Error Code	Description	HTTP Status
AUTH_001	Invalid Credentials	401
AUTH_002	Access Denied	403
AUTH_003	Token Expired	401

11.Conclusion

[Provide summary and final recommendations.]
