

Configuration Guide Template

1. Introduction

1.1. Purpose

[Describe the purpose of this configuration guide.]

1.2. Scope

[Define the scope of configuration activities.]

1.3. System Overview

[Provide a high-level overview of the system or application.]

2. Environment Details

Environment	Purpose
Development	[Local development environment]
Staging	[Pre-production testing environment]
Production	[Live production environment]

3. Prerequisites

Requirement	Description
Operating System	[Ubuntu / Windows / macOS]
Runtime	[Node.js / Python / Java]
Database	[PostgreSQL / MongoDB / MySQL]
Access Requirements	[VPN / SSH / Admin Access]

4. Configuration Parameters

Parameter	Description	Default Value	Required
PORT	[Application Port]	8000	Yes
DATABASE_URL	[Database Connection String]	[Value]	Yes
JWT_SECRET	[Authentication Secret Key]	[Value]	Yes
LOG_LEVEL	[Logging Level]	INFO	No

5. Application Configuration

Configuration File	Purpose
.env	[Environment variables configuration]
config.yaml	[Application settings configuration]

docker-compose.yml	[Container orchestration configuration]
--------------------	---

6. Database Configuration

Configuration Item	Description
Database Host	[Database server address]
Database Port	[Database service port]
Connection Pool	[Database pooling settings]

7. Security Configuration

Security Area	Implementation
SSL/TLS	[Enabled / Disabled]
Secrets Management	[Vault / Environment Variables]
Access Control	[RBAC / IAM Policies]

8. Third-Party Integrations

Service	Purpose	Configuration Required
Email Service	[Transactional emails]	[API Key]
Payment Gateway	[Payment processing]	[Client Secret]
Cloud Storage	[File storage]	[Access Credentials]

9. Deployment Configuration

Configuration Area	Description
Docker	[Container configuration details]
CI/CD	[Pipeline environment variables]
Load Balancer	[Traffic routing configuration]

10.Backup and Recovery Configuration

Configuration	Description
Backup Schedule	[Daily / Weekly backups]
Retention Policy	[Backup retention duration]
Recovery Procedure	[Restore process details]

11.Troubleshooting

Issue	Possible Cause	Resolution
Service Not Starting	[Configuration Error]	[Check logs and variables]
Database Connection Failed	[Invalid Credentials]	[Verify DB settings]

12.Conclusion

[Provide final notes and recommendations.]
